Status of the Claims

The response with amendments filed 26 May 2004 has been received and entered. Claims 10-17 have been presented for examination.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

Claims 10-17 stand rejected under 35 U.S.C. 102(b) as being anticipated by Jaroszeski et al. (WO 9964581).

It is argued that Jaroszeski et al. (WO 9964581) does not teach a cell fusion apparatus as the instant claims require where there is an insert to hold a fluid medium that comprises the substrate to which the cells are bound, and that the insert fits inside the cuvette.

Figure 5 of Jaroszeski et al. (WO 9964581) can be interpreted to meet the instant claims. The nature and manner of the cuvette is not distinguishable from the holder in this figure. The remaining elements constitute an insert inside the holder. The insert then comprises the porous substrate (34) and has electrodes (30, 32) as shown that are connected to fusion means via the metal brush. A vacuum port (38) facilitates attaching cells to the substrate.

Applicant's arguments filed 26 May 2004 have been fully considered but they are not persuasive. The rejection under 35 U.S.C. 102(b) is adhered to for the reasons of record and the additional reasons above.

No claims are allowed.

In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
